Hi Donna,  
UDEM has not established an incident command center in Utah, yet. Speaking with them yesterday, they are on standby, and if conditions in Utah warrant a command center, they will act.

I'm not aware of EPA's plans.

I hope that helps.

Kim

Hi Aimee,

We just wanted to run a quick question by the governor's office. The other states affected by the spill, Colorado and New Mexico, have set up mobile command centers that are hosting regular public information sessions for residents with concerns. These centers are officially hosted by the EPA, but the states themselves have been actively involved with them as well. Do you know if there are any plans to set up such a venue -- or even some other kind of public meeting -- in Utah?

Many thanks in advance,
